

Yurii K.

📍 Kharkiv, Ukraine

Front-end developer

My life is maniacally structured. So, I'm more than just attentive to details. I'm - perfectionist! My code is structured, my designs are straight, my workspace is absolutely clean. And if you are looking for something pure and simple, just let me know.

I can work on my own or will take a part in your project with great pleasure (for reasonable reward, of course). Also, you can propose me a full-time job in Ukraine or outside of it.
